**Head of Technology at Clickin'**

Clickin' – Keep Scoring! is a young mobile technology start-up venture that seeks to revolutionize the way people express themselves. The Company has developed a social messaging app specifically targeted at the dating space. The app is live on the Apple App Store.

Clickin' is supported by Ixora Ventures – an early-stage growth focused investment firm. We are currently expanding our team and we are looking to add young, driven and dynamic individuals who are itching to make an impact. Presently, we are on the lookout for a talented and experienced **full stack developer** to drive all things technology at Clickin'!

**How would you would spend your days?**

- Understanding requirements, defining product vision and strategy with the founders and working to execute it.

- Assume ownership of products, including: defining scope and developing requirements for new and advanced products; as well as upgrades and progressive releases for existing products

- Write beautiful self-documenting code that others can easily read and adapt.

- Analyze and optimize UI and back-end application code for efficiency and performance

- Working on Quality Assurance and Design to build on existing synergies to create a high quality product.

- Creating product specification documents and conducting product specification reviews.

- Conducting research and gathering data, ultimately understanding Clickin's user base to ultimately drive user engagement.

- Manage user growth and assist in developing acquisition strategies.

- Hire and manage dedicated development teams.

- Deliver the results on time
